

Product information

Compatibility Charts: Digital road maps DVDs/USB Sticks for the BMW HDD navigation systems EUROPE

Product description

With this product information, we would like to provide you with an overview that will enable you to quickly and easily allocate the available updates for the digital road maps to the appropriate BMW navigation systems.

The compatibility tables contain all available updates for the Digital Road Maps with the associated part numbers. We are trying to make it easier to search for the necessary part number for updating the digital road map, which depends on the head unit installed in the vehicle. You can clearly identify the corresponding head unit based on the combination of model, series, the time of production of the vehicle and the built-in navigation option.

In order to make this overview as simple as possible, different compatibility tables for ECE, USA and RoW created.
