Product description

With this trim, a tailpipe trim in the 8-cylinder look is offered for the X6 6-cylinder vehicles. The high-gloss, chrome-plated stainless steel cover is already welded to the connection pipe and can be attached to the existing exhaust system using a clamp.

This must be trimmed beforehand. In addition, the section of the rear apron around the tailpipe trim has to be trimmed. This cutout is covered with a plastic panel to be painted in the vehicle color.

Sales arguments/advantages

- Distinctive appearance of the rear of the vehicle
- No welding of the panel necessary
- All parts made of high-quality stainless steel to ensure a long service life and resistance to corrosion.
- Chrome finish

Material

The tailpipe trim is made of polished, chrome-plated stainless steel and is welded to a stainless steel tube.

- Circumferential adhesive tape is attached to the primed plastic panel.

Scope of

delivery - Welded tailpipe trim on the connection pipe.
- Clamp - spacer
for N54/N55 vehicles, due to different pipe diameters.

- Closing cap and cable tie for sealing the vacuum hose.
- Primed rear apron panel with circumferential adhesive tape.

Content/up-to-

dateness Please note that the product information is only intended to provide preliminary information about new products.

Before ordering, always check the specified part numbers in the EPC. Only the ETK provides the currently valid statement.

Chrome exhaust pipe finisher

Note

With 6-cylinder petrol vehicles, there is no exhaust flap due to the tailpipe finisher. This can lead to a slightly increased noise level when starting up and driving at low speeds.

No additional approvals or entries in the vehicle documents are necessary. In terms of design, quality and safety, the accessories meet the high standards that apply to all BMW products. All legal requirements are met.
