

Original BMW accessories Retrofit kit trailer hitch with removable ball head SA 235 5 Series Sedan (F10) and Touring (F11)

Product description

Trailer hitch with removable ball head. A special feature compared to the offers of the competition

Trailer stability control: The vehicle's dynamic control system DSC, which comes as standard, takes into account the special conditions of driving with a trailer, thereby increasing safety. That is why retrofitting is always accompanied by coding of the control electronics by the dealer. She effects

also that when reverse gear is engaged when towing a trailer, the electronic parking aid that may be present is deactivated. The trailer stability control is on in the DSC integrated system and is based on the assignment of the socket activated at the rear.
