

Product information

Original BMW accessories. M Performance Interieurleisten Carbon/Alcantara.

Product description

Innovative and unmistakable design made from motorsport material: open-pored carbon fiber combined with Alcantara.

This completely new technology provides direct contact with the high-tech material carbon fiber. As with the painted carbon covers, a real carbon fiber layer is applied to the plastic carrier. Unlike the

In the variant coated with polyester paint, the carbon fiber is sealed with a special filler and then sealed finished with a protective satin finish. The structure of the carbon fiber remains open and can be felt. Mixed with that too

Alcantara, the material used in exclusive sports car construction, the new M Performance interior panels offer a completely new, unmistakable dimension in terms of look and feel in the interior.

Details

- **New** design made from **real** carbon fibers. The **open porous** structure can be felt, ie high-tech material to touch.
- **Significant** differentiation from standard bars of all lines or Base. **Real** motorsport feeling in the interior.
- **Interesting** mix of materials with Alcantara and embroidered M Performance branding on the Alcantara front passenger panel.
- **Coherent** overall picture in combination with the others M Performance interior products steering wheel, shift knob and Handbrake handle with bellows, which are also made of a material mix of open-pore carbon and Alcantara.

Recommendation

- Other M Performance interior products such as steering wheel, Shift knob and handbrake handle with bellows, which are also in the Material mix carbon open-pored and Alcantara are kept.

M Performance Interieurleisten Carbon/Alcantara
